1. Claims 5-7, 17 and 18 are objected to because of the following informalities:

Claim 5, lines 2-3, the phrases "the doped polysilicon layer" and "the silicide layer" have no antecedent basis. Claim 17, line 2, the phrases "the doped polysilicon layer" and "the silicide layer" have no antecedent basis. Appropriate correction is required.

2. Claims 1-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification (paragraph [0030] and fig. 2) discloses the fusible link 30 comprises two substantially triangular regions 32. However, the specification never discloses the terminals having a substantially similar triangular shape and size as claimed in claims 1 and 9. The specification also never discloses triangularly shaped and similarly sized terminal regions as claimed in claim 13.
